

LIST OF INTERIM TESTS WITH REQUIRED HANDSCORING

While the majority of interim test items are now machine-scored through automated scoring engines, there are still a handful of items that require handscoring by a human teacher. Teachers that administer one of the following assessments to a student should check for any pending items awaiting scoring in the Reporting System. All items must be scored prior to receiving a score report in Reporting. For more information on how to score and review scores in Reporting, refer to the [Reporting User Guide](#).
